

Lyme School District

Hazardous Material Abatement Project School Informational Tour

Please join us for a tour of the school and discussion of the evolution of the building, the educational spaces created with the 2014 addition, and the current issues which need to be addressed in the school.

The project proposal includes construction to address:

- Abatement of hazardous materials (asbestos and lead)
- HVAC issues including temperature control, efficiency, and ventilation
- Security & safety updates
- Energy efficiency updates
- Associated requirements including ADA-compliant primary restrooms

We are offering two dates and times for community members:

Saturday, January 27, 2024 at 10:00am

Saturday, February 3, 2024 at 10:00am

Please meet at the main school entrance on either of the dates and times listed above.

Information about the project and proposed Bond warrant article will be posted on the Lyme School Board web page under the new “Projects” button. We encourage you to check there for the most up to date information going forward.
